Saxophones

by Trevor James

Why choose Trevor James

We believe that musicians new and experienced who choose to play Trevor James saxophones deserve an instrument that not only meets their expectations, but exceeds them!

We are the UK's leading specialist woodwind company with over 30 years experience in design, manufacture and distribution. Our priority remains to ensure that the tonal quality of each Trevor James saxophone enhances the dedicated effort put into the study and performance of sax players around the world.

- Pads without reflectors

*n/a in 925 silver

UNIQUE

Create your own unique instrument by choosing from the metal and finish options listed below for your crook, body and bow/bell. Mechanism will be gold lacquered as standard. Silver-plated mechanism by special order.

Gold lacquer

A good all round choice and the most commonly chosen finish. The lacquered brass gives a warm tone and reliable projection.

Bronze

Popular for the players searching for that vintage type tone. It gives a warm and moody sound. Great if you want an older, jazzier swing type of sound.

Red brass

Compared to the gold lacquer, red brass has a slightly darker sound with more 'punch' and dynamic tonal qualities. Some players say that it has a wider selection of tonal timbres than gold lacquer.

925 silver

The ultimate in sound for many sax players, the resonance of silver is much faster than the other available finish options giving a much broader and edgier sound. Combine the silver body with a bronze bow/bell and you have a sax that will give great dynamics with a dark and warm sound. The ultimate in sax and sound.
